

We are looking for an experienced Design/Technical Manager to provide technical design management services to a range of projects up to £400 million in value. We are looking for someone who is client focused, passionate about a service that excels and will add to our wide breadth of experience and working knowledge across a range of refurbishment, conversion, and new build construction projects.

### About us

Silver (trading name for Silver DCC Limited) has recently celebrated its 75-year milestone. From our infancy in quantity and building surveying specialisms, we have developed organically into a multi-disciplinary practice; providing a wide variety of services to our clients including Building Surveying, Cost Consultancy, Project Management, Employer's Agent, Health and Safety CDM Coordinator/Principal Designer, Site Inspection and Party Wall Surveying services. We have a broad base of clients with significant property portfolios.

We have diversified our service offering through successful recruitment, graduate programmes and continuous investment in technology, training and development.

Based on our continued optimism and plans for growth through new opportunities and client acquisition, along with our core value that our employees are the foundation to our success; we believe that we can offer an excellent career opportunity and progression, predominantly working in the residential and commercial sectors.

### Job overview and core competencies

**The main duties of the role will include, but not limited to:**

- Technical checking of design information provided by:
  - Architects
  - Structural and Civil Engineers
  - MEP Consultants
  - Fire Consultants
